Objects on Loan/Internal Control (PA-PA).....5

Objects on Loan/Internal Control (PA-PA)

Use

As part of the master data stored for the *Human Resources* (HR) application component, you can use infotype 0040 *Objects on Loan* to record objects that the employee has borrowed from the enterprise. Infotype 0032 *Internal Control* enables you to store company car data for an employee.

However, you can also choose to record an object on loan or a company car as an object within *Asset Accounting* (FI-AA).

Integration

Technically, the *objects on loan/internal control* interface has been decoupled.

Prerequisites

Integration is active between FI-AA and data stored in the HR System on objects on loan and company cars.
